

ISTE Students Chapter

Proteus for Arduino Simulation and Design

Description	:	A hands-on workshop was organized by ISTE Students' Chapter, BVM Engineering College for second year students of EC department. Introduction on Proteus software and its used for Arduino programming and circuit design was covered with aim to bring awareness of simulation environment for application design. Software simulation provides a broad workspace for students to experiment with different components for application without incurring hardware cost.
Technical/Non-Technical Event	:	Technical
Subject	:	Proteus for Arduino Programming to design Embedded System
What skill will be developed/evaluated	:	Arduino Programming, Circuit design, Interfacing peripherals with Arduino, Circuit Simulation using Proteus.
Branch	:	EC
Year	:	2
Date	:	19/01/2019
Time	:	11:00 to 2:30
Venue	:	F 302 EC Department, BVM Engineering College
Entries	:	15
Level	:	-College/Local
Faculty Convener		Prof. Hiren Patel,
Student Coordinator		Shreyansh, Rohit
